# FIRE RATED

Wall Access Panels (FRW)

## Product Overview

**Trafalgar Fire Rated Wall Access Panels** are manufactured in Australia and have been designed for use where access is required into fire rated walls. They feature concealed hinges and provide lockable access to services. Trafalgar FRW panels have been fire tested to Australian Standard AS1530.4-2014, and have attained up to a two hour fire rating for walls and service shafts.

Trafalgar manufacture and supply a two hour fire rated wall access panel with concealed hinges and a key lock option.

Trafalgar Fire Rated Wall Access Panels are available with fire ratings of one or two hours. When installed, they sit flush with the surface, leaving a neat opening around the perimeter.

These panels are secured with an allen key style lock as standard, however a key lock option is also available.

Standard sizes of Fire Rated Wall Access Panels are readily available and competitively priced, and are easy to design and order. Custom sizes can also be manufactured to order.

Access panels are typically installed during construction, but they can also be retro-fitted when additional access is required.

Trafalgar specialise in manufacturing large **custom size** access panels with varying hinge and lock options to meet architectural specifications.

## Technical Specifications

### PRODUCT DESCRIPTION

<b>FIRE RATING</b>	Plaster/masonry: Up to 1 hour: -/60/60 Up to 2 hour: -/120/60 Hebel: Up to 90 minutes: -/90/-
<b>Door Panel</b>	Paint grade Trafalgar panel incorporating Maxilite high performance fire rated board.
<b>Frame</b>	Welded, fully primed steel.
<b>Cut-Out Size</b>	<p>Cut out a hole in the wall the same size as the access panel. For example, a 450x450 access panel will have a 450x450 cut out.</p> <p>With Trafalgar FRW panels there is no need to line the inside of opening with fire rated plasterboard, unless required by the walling system.</p>
<b>Frame Types</b>	Flanged Edge (FE) or Wet Wall (WW)
<b>Hinge</b>	Fully concealed hinges.
<b>Lock</b>	Budget square key lock as standard (Allen key style lock). Key lock options available.
<b>Also Available</b>	Trafalgar can custom manufacture to meet your specifications. Trafalgar also supply a comprehensive range of metal, acoustic, customwood, security and speciality access panels.

**Wet Wall Frame**  
(Set bead for plastering in)

**Flanged Edge Frame**  
(Architrave / picture frame)

**FRW Frame with MDF cover**  
12x60mm MDF flange can be used to achieve 60 minutes insulation rating for plasterboard/masonry walls (not supplied).

Wall Access Panels (FRW)

# Installation Instructions

## FRW - Profile Details

Access Panel	Use	Construction	Fixings	Fixing Type	Max Fixing Centres
FRW	Wall	Plasterboard	8 gauge	Self-tapping	150mm
FRW	Wall	Masonry	M6	Masonry Anchor	300mm
FRW	Wall	75mm Hebel	8 gauge	Self-tapping	300mm

## Installation Instructions – Plasterboard and Masonry

1. Mark out and cut an opening in the ceiling or wall to suit the dimensions of the access panel (e.g. 450 x 450), taking into account the position of existing joists. Note that for plasterboard installs, no fire rated plasterboard lining is required.
2. With the hatch of the access panel open, insert the panel into position and fix through the fixing holes in the frame into the surrounding framework, with fixings as detailed in the table above and see drawings below (next page).

### NOTE:

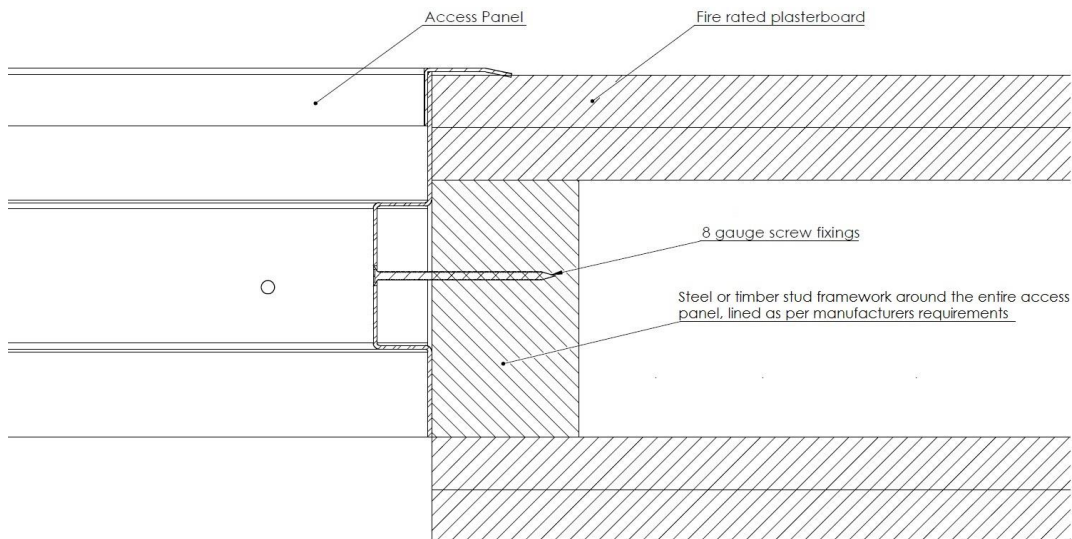

- The installation of Trafalgar Fire Rated Access Panels in plasterboard/masonry walls does not require fire rated sealant (unless required by the wall system).
- Trafalgar Fire Rated Access Panels have been fire tested to the new and more stringent requirements of Australian Standard AS1530.4-2014.

Wall Access Panels (FRW)

# Installation Instructions

## Installation Instructions – Hebel walls

1. Mark out and cut an opening in the Hebel wall to suit the dimensions of the access panel (e.g. 450 x 450 for a 450x450mm panel).
2. The Hebel wall should be trimmed on the rear side with 75x50x1.2mm slotted angle (not supplied) fixed with 10gx65mm steel screws at 300mm centres as per wall manufactures specifications.
3. With the hatch of the access panel open, insert the panel into position and fix through the fixing holes in the frame into the surrounding wall, with minimum 8gx100mm screws at 300mm centres as per the below drawings.
4. Apply Fyreflex sealant to the full depth of the frame's rebate. Care should be taken to not seal the locking mechanism.

### NOTE:

- Trafalgar Fire Rated Access Panels have been fire tested in Hebel walls to the new and more stringent requirements of Australian Standard AS1530.4-2014
- Access panel must be installed over the tongue and groove joint in the Hebel wall with the penetration located centrally over the panel joint (i.e. 225mm cut out of each panel for a 450mm opening).
- Access panel must be installed into the bare AAC wall panel, without any plasterboard facings.

## FRW - Hebel Install
